

MAGNUM

A precision point tool, likely a micro-drill or engraving tool, is shown vertically. It features a black, cylindrical handle with two small screws on its side. Below the handle is a brass-colored adjustment ring with a knurled texture. The main shaft is a long, thin, polished metal rod that tapers to a sharp point. The tool is positioned against a dark, reflective background, with a portion of a metal component visible on the left side.

PRECISION
POINT

The Magnum Micro 1003 Soldering Iron puts a finer 'point on precision'.

It's expressly designed for your fine detail work.

The NEW Magnum 2006 Dual Workstation

The Magnum 3005 Desoldering Station

All points considered, the Magnum Micro Soldering Pencil features super-fast heat-up time and superior thermal recovery for fast, efficient soldering -- and is fitted with a burnproof silicone cable for use with the 3005, 2005, 2004, and the 2002 soldering workstations.

The extremely versatile Magnum Micro Pencil is *the precision instrument* you need for all your finer work, and is exactly what you've come to expect from Magnum.

The same Magnum Quality.
The same Magnum Dependability.
The same Magnum Performance.
The same Magnum Service.

Contact us today, or ask your representative for a free demonstration.

You're sure to get the point.
